Dynamics AutoCAD's CAM tool, CAM-Workbench, supports the Dynamics Core from Technology Software, Inc. (TSI), and CAM product line from GeoMedia. The product can create and manipulate surfaces, solids, arcs, polylines, points, and solids in 3D, or view them as 2D topographical maps. CAM is designed for the user who is creating or editing 3D models and also for the designer who is creating and designing 2D topographical maps. The user is designing for the project, in which they work, or the environment. AutoCAD has extensive support for the US National Geospatial-Intelligence Agency (NGA) spatial data standards, including the coordinate reference system (CRS) Geographic Information Systems (GIS) coordinate reference system (CRS) Support for SLD, HDF and SCT XML. UTM and equal-area grids, and RSLs, is provided. AutoCAD supports dynamic programming and scripting languages including Python, VBScript, C++, and other languages on Windows, Linux and Mac OS X. The languages are highly compatible with AutoCAD.
