Adobe Kuler Kuler is an online tool that allows you to create color schemes. You can import color swatches that you've already made or choose from one of their predefined color palettes. Viewing and using the Layers and Images dialog box The Layers and Images dialog box is the easiest and most efficient way to create and manage layers in Photoshop. In the default Window style, the dialog box is one big scroll-up window. You can drag this window to another location, if you want to split it up. The layers are listed in a bitmap format. To view the layer's details, click the triangle in the layers' title bar and choose View All to show the text, like this: If you notice the layer's contents display a different type of outline than usual, it means that the layer is being used in a comp or a group. If a layer is part of a group, it typically will have a rounded rectangle outlining the group, like this: If you click on the group, you'll see a layer menu and the individual layers that are part of it. As an example, if I were to click on the "Normal" group, I'd see the individual layers that's part of it displayed. You can perform most of your edits, such as cropping, resizing, and rotating and flipping layers, by using the dialog box. To crop a layer, for example, click on a portion of the image for the selection. After you click on the Convert to Selection button, the layer is now selected, and you can crop it by clicking the Crop option from the layer's menu, like this: Or you can crop the image by going to Image > Crop.
