Why you should choose Tiny Image Viewer (Mini Image Viewer) as your software? Thumbs up for the Tiny Image Viewer app from MediaDefender. The program is a handy tool. It is a great mini viewer of JPG, BMP, ICO, PNG, and JPEG images that can be started from a file manager or a desktop. It displays images in fullscreen, showing no information of any kind on the display. The app allows thumbnails to be displayed, with full image resolution. You can scroll through the thumbnails. You can select one of the thumbnails to see its full size image. If you select one of the thumbnails to be the application's current active image, the program will automatically create a new image file. The program options help you to get a better result when you need to see the images in a better way.
