The concept of desktop application plugins was introduced in version AutoCAD 2000. Before this, the approach was to import an AutoCAD drawing into a user-created drawing. History In 1994, Autodesk released AutoCAD for the first time. The company received its first round of venture capital in 1997 and went public in 1999. One of Autodesk's first products after going public was a free utility that allowed users to create drawings in any shape (not only square and rectangular ones), called a house generator. In 2002, Autodesk acquired Hexagon AB, a company based in Sweden. Hexagon's product, Hexagon Modeling System, was the industry's first large-scale workflow architecture. One of Hexagon's products was to create a drawing from an assembly and manufacturing design. The same year, Autodesk acquired Synopsys, Inc., a designer of EDA tools for ASIC design, and merged its software technology into Autodesk's EDA software suite. Autodesk also bought three other companies: SDRC, which manufactured electron-beam fabrication equipment; Star-O-Nite, a provider of design tools to the entertainment industry; and Rhino-CAD, the first major 3D authoring tool to become a commercial success. Awards AutoCAD won "Best Product" and "Best Engineering" in the 2012 User Awards. Controversies Lung cancer lawsuit On November 19, 2012, Autodesk was hit with a \$7.2 million settlement for a lawsuit on behalf of 11 workers who alleged they suffered from lung cancer after using the software. The lawsuit was brought against the company by the law firm of Morrison Foerster LLP. The lawsuit alleged that the company "failed to warn them of a clear and present danger posed by exposure to formaldehyde, a substance that is highly likely to cause cancer." The suit did not accuse Autodesk of causing the workers to develop cancer, but instead alleged that Autodesk's failure to issue such warnings "represented a reckless indifference to the health and safety of its employees." In addition to the \$7.2 million settlement, the company paid \$14,000 in costs and expenses to the employees. Autodesk's own defense was filed by the law firm of Thompson & Knight, L.L.P. In Autodesk's response to the lawsuit, the company stated that it "intends to defend itself against the allegations and claims set a1d647c40b
