For those of you that didn't stay up for the "APRIL Fools Day" segment of our last episode did you guys miss anything, anything at all?! Well during that segment Senpai mentioned that if we show up dressed as actual characters dressed in their colors and make characters laugh we get our costumes, this game is a sequel to the "Dressed as faker maids" game we did before with 50 inputs... but instead of as Aiko (me) we're dressing as her tutor Nyotengu (Don't ask though, me and the faker's knows EVERYTHING when it comes to talking about a certain character's vore, cascavernour, anime, akihabara and even kendo).

RULES:

Clean the look, look good wearing it and know the character well.

Since there's 50 characters we're going to have a few categories:

- One time characters (characters never used in a vore game)
- Universal Characters (used in 3 different vores)
- Extremes (exotic, rarely, etc)

This is my first as it is still a part of development, and right now is just a test version of the whole game. Please be patient as I try to get the whole thing together. I realize, that since I am doing this from scratch, and since it is a visual novel that's based on a true story, a lot of you people are going to ask what's going on - like, who is this and what is this? And that's a good thing. I wanted to make sure that I created something that was authentic. I mean, you want to know what your character would have said? I want that you feel every little bit of this is very real. Also, this is going to be in several phases, and I will be devolping and improving on it as time passes.
