After years of rapid development and numerous minor changes, AutoCAD Product Key 2013 was released at the end of October 2012. AutoCAD 2013 is a major release that includes several improvements to drawing and exporting. AutoCAD 2013 provides a new user interface and new model for cloud-based applications. The new cloud-based application is called AutoCAD 360°. You can learn more about the new features of AutoCAD 2013 on the official website and Autodesk Blog. While reading the product announcement on Autodesk's blog, it is highly recommended to download and test the AutoCAD 2013 Release Candidate. The AutoCAD Release Candidate is available in the Autodesk Gallery. In this post, we will take a look at the new user interface of AutoCAD. What is new in AutoCAD 2013? The user interface of AutoCAD 2013 has been completely redesigned from scratch. The tool palette and drawing canvas have been moved to a single tool palette, and all tools are now grouped into tool palettes. The tool palettes are on the left side of the drawing window. You can drag the tool palette to any position on the desktop, or you can pin it to the top of the drawing window. The drawing canvas and tools are now organized into tool palettes. The User Interface The drawing window in AutoCAD 2013 has been redrawn. All the windows are now top-level windows that can float above other windows. The layout of the drawing window has been changed to maximize space in the lower right corner. One new component of AutoCAD 2013 is the Export to PDF (AutoCAD 2013 only) or DWG (AutoCAD 2010 or AutoCAD LT 2010/AutoCAD LT 2012/AutoCAD LT 2010 SP2) tool, which is located in the View menu. You can enable the Export to PDF/DWG feature via the Tools | Export to PDF/DWG menu command. The Export to PDF/DWG feature was introduced in AutoCAD 2013. It will export your drawing as a PDF file or as a DWG file. The feature only works with the native drawing viewer (AutoCAD or AutoCAD LT). It will not work with any web browser. To learn more about how to export your drawings as PDF files, DWG files, and JPG files, you can refer to the Export to PDF/DWG
