Junctions is an increasingly difficult family of puzzles, where you must get one colored square onto another colored square. This puzzle type is what makes the experience more challenging, and eventually mind-bending, that is, when you start looking at it for a long enough time. It's a game of strategy, as the squares you get are locked into a specific position, and you must plan your play accordingly. You don't just have one square at a time to move, as you only get one attempt to get it into its rightful place. If you mess up, it's gone for good. Simple but addictive! It is a 2-player puzzle game, but you can play this alone if you like! Junctions can be played using the mouse or keyboard and can be played in full-screen mode or full-screen window mode. It's a quick, fun puzzle game that you can play at any time of day or night. Buy Your Steam Key Today!!! Is your Steam library starting to look a little bare? Do you want to start something new but don't know where to start? If you answered yes to these questions, then we have the perfect game for you. Simply Puzzles: Junctions is a new puzzle game, designed specifically with the new player in mind. It's a great starter puzzle for new players. The goal of the game is simple, to get a colored square from one colored square to another colored square. That's all there is to it. If you mess up, it's game over. It's a simple, easy to learn puzzle, that will keep you playing for hours! The game itself is made for one player, however if you want to play two players, you can make two copies of the game and give one copy to each player. There are five difficulty levels in the game, with each level gradually getting harder. With each level, the goal is to get a colored square into its target square. While the goal is the same, the difficulty of the level dictates the way the game is played and the moves available to you. You may have read about us on Knoji or on other websites, but we are a group of programmers, artists, and mathematicians who want to make a positive impact on the Steam community. We hope that by offering new, fun, and addictive puzzles, we will help stimulate your brain and perhaps even keep you from being able to stop playing. If you want to help us
