The legendary Elden Ring that is said to have been forged in an ancient Elven Age through alchemy. In the present day, the Elden Ring has finally been lost. A mysterious ancient artifact that can be obtained through a lottery held every year, Elden Rings come with an associated curse. When a person is born into the Elden Ring, they'll become an Elden Lord and fight in an endless war against the forces of darkness. The fate of the race rests on that person's shoulders. The Elden Rings exist in a different world, called the Lands Between, where fierce battles are fought to protect the land. Players unlock story scenes related to the main character in a tiered design, and through an online play mode they will be connected to other players. A variety of other content featuring old characters will also become available. • Pre-Overseas English Language Pack • Pre-Overseas English Language Pack is Available. ♦Please read the following important announcement for the English language pack overseas version. ♦Please note that the following applies to the overseas edition. ♦Fans who have purchased the overseas edition of the game, should play the overseas version without any extra charge. [Product page]Q: Is the double magnetron (DMG) used in microwave ovens a new invention or historical? The double magnetron (DMG) seems to be a recent invention. The Wikipedia page on it just says that during the Second World War, physicists worked on a double magnetron. When this later evolved into a doubled magnetron, came to be known as a DMG. Is the DMG used in microwave ovens a new invention, or has it been around for some time? A: I don't know if the Wikipedia page is accurate, but it looks like it is.

## ARTEFACTS

## STORY

The Tarnished Ring, a very old legend, has existed for centuries- while it remains, the world of fantasy continues. So the world had forgotten it until now, and for that reason it was not announced to the outside world- In the long history of humanity, there was no instance of someone possessing the artifact.

Inside the ring lies a story of how the people who witnessed the Tarnished Ring were born into the world, and that is the reason it is called "The Tarnished Ring." While inhabiting the lands, adventurers caused these tales to be recorded. By doing so, the people who drew the history onto paper, precisely and beautifully, had a dream as their goal-in order to save their lands.

The dream of the adventurers, however, did not last.

With time, the ring was stolen into a small walled village, and for that reason it left unaltered, and came to be known as the Tarnished Ring.

At the end of the aforementioned story, the Tarnished Ring appeared in a dream for the first time.

At that time, it appeared to the protagonist and the other characters in a split-screen field, and said, "You will carry on its saga. There is an adventure waiting for you."

NEXT TIME...

As you can see, a new adventure is on the way.

I hope you look forward to it.

Thank you.Q: Prove that  $G = \text{Ker}(f) \triangleleft N$  by Case 1,2 or 3, where  $f: N \rightarrow \mathbb{Z}_4$  is not surjective Let  $N$  be a finitely generated torsion free group and  $f: N \rightarrow \mathbb{Z}_4$  is the map defined by  $f(g) = 1$  where  $g \in N$ . We note that  $\text{Ker}(f)$  is a subgroup of  $N$  and  $\text{Ker}(f) \triangleleft N$ . Question: Suppose that  $f$  is not surjective. Prove that  $G = \text{Ker}(f) \triangleleft N$  by Case 1,2 or 3, where  $G$  is the cokernel of  $f$ . My attempt: Let  $\pi: N \rightarrow G$  be the canonical homomorphism from the previous lemma. Case 1: Suppose that  $\pi$  is the trivial homomorphism. We know that  $G = \text{Im}(f)$ , so the first step is to show that  $G = \text{Im}(f)$ . I hope to use that since  $\pi$  is the trivial homomorphism,  $f \circ \pi = f \circ i_{\{1\}}$ , so that  $\pi(f) = i_{\{1\}}(1) = i_{\{1\}}(f(1)) = i_{\{1\}}(1) = 1 = 1$ , so  $\pi(f) = 1$ . So  $f \circ \pi$  is the identity. By the first isomorphism theorem,  $G = \text{Im}(f) = \text{Im}(f \circ \pi) = \text{Im}(1)$ , hence  $\text{Im}(f) = \text{Im}(1)$ . So, in this case, I want to show that  $G = \text{Im}(1)$ . Now,  $\pi: N \rightarrow \mathbb{Z}_4$  is a homomorphism, so  $G$  is a subgroup of  $\mathbb{Z}_4$ . Since the only finite**
