About the Game Armored Warfare is a free-to-play online video game that allows players to enlist in one of five different countries' armies, unlock numerous vehicles, and engage in one of the most immersive and intense war games to date. Players choose a faction to join and are then thrown into the middle of modern conflicts across three theatres of operation: the Russian Steppes, the Middle East, and Eastern Europe. Players can then choose from more than 50 different vehicles such as armored fighting vehicles, light, medium and heavy tanks, as well as wheeled, tracked and amphibious vehicles. Players are then placed in three different game modes and must use the vehicles they have to their best advantage to gain victory on the battlefield. The five factions - United States Army, Russian Ground Forces, German Army, French Army, and Italian Army - provide a different feel and set of gameplay. Post Your Comment 183 Comments Your game just isn't compatible with mine. I have built the base game 5 times and every time a save file is created it can not load my save and gives an error. I've tried using the CD and can not load my save either. Since you say it is playable on a variety of PC's I will play it on my own computer but when the time comes to import the game I will not be able to play. I'd be very grateful if you would fix the save error. If you want I can e-mail you the game code on my e-mail and you can fix the error and please leave the files on your site so that people like myself can use it. Yours, Robin I have a weird bug.
