Death Fungeon is a game about death. Let the name sink in for a moment. The game is about dying. And yet... it's not a game about dying. Yes, the game will take you on several very taxing rides in your quest for unfortunate death, but you'll die again. And again. And again. But this time there'll be no respawning, there'll just be a loading screen. Another player will take your place.

Developed by two independent teams of developers, with no connection with the music industry, Death Fungeon seems like a game you can play no matter your tastes. As the music itself can vary drastically within the game, there's a vast variety of combinations available. Seriously, this game should be checked. Just pick up the first level and play it. The load times are very low

compared to other games with similar features and the gameplay is very smooth and easy to grasp. A much appreciated addition are the small, red, bouncy balls which bounce around you, removing this otherwise very frustrating death limit with regularity. If you want to talk about value for money, Death Fungeon is the game for you. At this price you can't really go wrong. The game is available for iPhone, iPad, Mac and Android. Let us know if you've got an iPhone 4S, iPad 2, iPad 3rd gen or Kindle Fire in your hot little hands. At the time of writing, the game has got a rather low App Store rating of 2.2 and not a single write up on it on [www.appshopper.com](http://www.appshopper.com). Few more things about it: There are no tutorials or graphical explanations for the controls and button layout. The button layout is clearly explained with pictures, but there is no clear explanation for the controls. You can move the red ball by swiping your finger from left to right, the blue ball by swiping from

nanobiomechines. With the unprecedented success of both robotics and computing, it has become easy for ordinary people to have effective control over them, thus enabling the development of the nanobot apocalypse. How to play “The Ultimate NANO-BOT-EXPERIENCE”? The game is very easy to play. In the laboratory world, there's an epidemic of a new organism that can infiltrate the body of its host, turning them into a zombie. To defeat the enemy it is necessary to upgrade the Nano Bot so that it can serve as a powerful weapon. For this, the Nano Bot must be able to gather the required hormones from special substances. To find the required substances and prepare the upgrades, the player must travel to various locations. We chose to reuse the concept of the ZombiU game, adding a new scenario of being the last guy on the Earth. Explore the Laboratory world, Defeat the various types of enemies, Donate your resources to the Nano Bot in order to prepare it to be the ultimate soldier. Features - Story and game world designed for adults. - 3 Difficulty levels: Easy, Hard and Extreme. - Immune system of the organism and weapons to kill it. - 10 types of enemies to fight and defeat. - 2 types of progression: Speed, and Quantity of energy. - No power-ups, No Health or Ammo. - Upgrades that will help the Nano Bot. - Additional Information about the Nanobot. - A sandbox like game experience. - Full version of the game allows you to retrieve your progress, if it is purchased, and will be available in the Steam marketplace. - Save game and system information will be available for download on the main menu. - Game systems developed for the mobile market. - Full control

One of the main routes of the old Great Western Railway, the Bristol Exeter line is 85 miles long and dates back to the 1840s. Currently the principal operator on the route is First Great Western, with high-speed trains providing fast services from London through to the West Country and multiple units handling local stopping services. This expansion pack recreates this wonderful line from Bristol Temple Meads to Exeter St Thomas, with all 12 stations in between plus all the cuttings, hills and valleys which make this such a scenic route. With a choice of free-roams and scheduled scenarios, there is plenty to keep you occupied throughout this beautifully-detailed expansion pack. Includes 85 miles of track to drive, including mainline from Bristol Temple Meads to Exeter St Thomas and Weston-super-Mare loop. Fully functional animated level crossings. Non-drivable rolling stock placed along the route including Class 20, Class 60, Rail Head Treatment Train, FNA Nuclear Flask, IWB Cargowaggon, Autoballaster and YGB Seacow. 14 Detailed Stations Bristol Temple Meads Bedminster Parson St. Nailsea & Backwell Yatton Worle Weston Milton Weston-Super-Mare Highbridge &

That is why roads.rail has created the brilliant and gritty simulation, RoadRail. Drive the train. RoadRail, available now for Android, has been created by Christos Tatsirami, a professional car mechanic who decided to create the game himself after a friend showed him the title, Assetto Corsa. The game is the perfect cross between racing and simulation games and builds upon the mechanics and sheer fun of Assetto Corsa, having the ability to drive on real roads and avoid the countless obstacles, other vehicles and a dis-orientating variety of signs. This pack includes some of the most iconic stretch of the Great West Route between Bristol and Exeter, with brand new routes that cater to different train
