About Rise: In Rise, you play as teen activist and world-renowned party animal, Sonja Dirkson. You're also a fully functional, part time robot assassin. So naturally, you need a name. After the events of Uprising, life as Sonja Dirkson becomes a bit more unpredictable. But no matter what anyone says about the protests, Sonja remains committed to making Libertonia a better place. She's determined to enforce the Riot Act on anyone with even a ghost of a chance of bringing her country down. Rise is designed and programmed for you to win and walk away, no matter what. No matter who's against you, you'll still be the stronger, better person. You'll fight to your last shot, your last bullet, and even the last atom in your body. But have you ever considered what happens to your body once you're dead? Have you given any thought to what happens to your body when you die? Of course not. You probably don't care. But that doesn't mean there's anything wrong with being a little on the selfish side. You're a teenager. You're a teenager who is about to embark on an adventure of a lifetime. And you won't let anyone stop you. The best part? Anybody can start over in Libertonia, so there's no disadvantage to picking the hero role. You are all just you: individually strong, sometimes stupid, and always unique. Rise's soundtrack (a collection of 20 songs ranging from folk and indie to trash rap) tries to capture the creative energy of the various people making up Libertonia and keep them dancing. Rise has four play modes, and, depending on which one you choose, will feature new challenges and audio. (Here's a quick summary of the four play modes: * Story Mode - The default Story Mode in Rise features a linear story beginning with riots and ending with Sonja and the Libertonia Police Force taking down the corrupt mayor. * Demo Mode - Requires a Demo Pass that can be purchased for an early version of Rise on Steam. It allows players to play the game in short bursts with small portions of the game. When the Demo passes expires, you're forced to start over. * Tilt Mode - In Tilt Mode, you can move the screen around with your head and c9d1549cdd

In reality, the sport of archery was invented by some Romans and reached its peak at the end of the 4th century. The archers, were able to make several series of arrows moving in parallel, with their archery but with a difference: after releasing the arrow, the archer used the

bow that served to stop it in a specific point of the target, just in front of the arrow. The arrow's trajectory was thus "steered" by a device called the "Guido Stick". The first shooting range is situated near Milan, Italy. On January 30th, 1971, the country is the site of the first competition using the "Guido Stick". The sport's first official international tournament had as competitors: the captain of the Italian national team, Paolo Pani, the English archer Paul Pond and a German born Italian archer named Guido Gandini (born on May 12th, 1938 and died on March 28th, 1996). Although the "Guido Stick" was nothing but a theoretical device, it created a great sensation, particularly in Italy where the capture of Gandini caused a scandal. The French daily La Croix and other French magazines started to promote Gandini as a hero. In this period, he gave up his studies and dedicated himself completely to his sport. He published several stories and essays on his sport and on his personal experiences. He also played the game of basketball, which was his other passion. In 1982, Gandini was a pioneer in the new shooting ranges that appeared in the state of Ohio. Soon, the sport in the USA was born and now the number of international championships is steadily growing. It is the 1980's and the beginning of the computer era. Some people dreamed of a more realistic interactive experience. Thanks to computer simulations, the computer was able to generate situations in a virtual environment with some difficulties, usually increasing the level of difficulty in the game. Now, it is possible to simulate the physical interactions with the game. Thanks to these tools, people experienced a change in their sports that were passing from an artistic environment to an interactive environment. These simulations generated the birth of videogames. For that reason, it is possible to imagine the birth of a sport that was with a real physical simulation, where the sportsmen, like Gandini, would be able to reach several levels of difficulty. Although most of the "virtual sports" were single sports, like archery or darts, this game will be different, being a sport
