Do you know about mysterious sounds in the mountains? Green Dragon - Original Soundtrack is an expansion of the PS2 game Green Dragon - Original Soundtrack, we want to expand the game in some areas that didn't work properly and because of that we decided to make a game, in which each player gets a separate soundtrack. Each time you play the game you get a different (sensible) soundtrack for 3 specific enemies, one time for each. The high quality mp3-files are made with the music synthesizer FL Studio and we want you to listen it so you know, what the soundtrack is about and how it was made. Please review the music and tell us, how you feel about it and what could we improve in future versions. Of course, we want feedback and help from you so you can correct mistakes and make the game the best it can be. So here we go, we hope to hear from you! Note: After buying, you can add the songs to your game files (greendragon/music library folder). You can find these files on steam. Key Features: 1. Each player gets 3 music for 3 different enemies 2. each time you play the game you get a different (random) music for 3 enemies 3. music is done with sound synthesiser FL Studio 3.
