However, if I do not give the url correctly my code will break and I have no idea why. Here's my simplified code: import requests url = "" url = url % (offset, limit) url = requests.get(url) print(url.text) This code will, however, not work if i do not give the url correctly. For instance i need to provide the url like this: url = requests.get("" % (offset, limit)) I have no idea why the second c6a93da74d
